

## **CHAIR'S REPORT ON THE G20 DEVELOPMENT WORKING GROUP SKUKUZA MINISTERIAL MEETING**

The G20 Development Ministerial Meeting under South Africa's Presidency took place in Skukuza, Kruger National Park from 24-25 July 2025. It was preceded by the Fourth Meeting of the G20 Development Working Group (DWG) held from 20-23 July 2025.

The meeting convened Ministers responsible for development as well as heads of international organisations for comprehensive deliberations on key global development issues.

The deliberations were marked by constructive engagement and meaningful outcomes. The following documents were adopted by consensus:

- The G20 Skukuza Development Ministerial Declaration.
- Ministerial Call to Action: Towards Inclusive, Resilient and Sustainable Development through Universal Social Protection Systems with special priority on Social Protection Floors.
- Ministerial Call to Action: Towards Voluntary and Non-Binding High-Level Principles for Combating Illicit Financial Flows.

Furthermore, in consultation with some members, guest countries and international organisations, a Chair's Statement on Emerging Principles on Fostering International Cooperation for the Protection and Delivery of Global Public Goods was developed, reflecting the discussions held in the group and calling for the establishment of the Ubuntu Commission, a panel of experts, to take this work forward.

Argentina reserved its position on certain elements of the Ministerial Declaration and its Outcome Documents.

The South African G20 Presidency expresses its deep gratitude to the members, guest countries and international organisations participating in the G20 Development Ministerial Meeting for their tireless engagement and commitment in developing these outcome documents to advance solidarity, equality and sustainability for current and future generations.

It is noted that one G20 member did not attend the Ministerial Meeting.

Skukuza, 25 July 2025

**Ends**

## STATEMENT OF THE ARGENTINE REPUBLIC

The Argentine Republic considers that the 2030 Agenda for Sustainable Development is composed of non-legally binding aspirations that each State, in the exercise of its sovereignty, has the right to interpret and pursue freely. Accordingly, the Argentine Republic reserves its position on all references to the 2030 Agenda throughout this document, which also extends to those deliverables that go against the guiding principles of life, liberty and private property.

Argentina declares that, while acknowledging the relevance of Illicit Financial Flows (IFFs) as a global challenge, it considers that the topic lies beyond the thematic scope of the Development Working Group. In Argentina's view, other G20 mechanisms are better placed to address such matters, where the necessary mandates and expertise already exist.
